We pride ourselves on exceeding our client's expectations and going the extra mile for them. So everything we do here is client first. We talk to the clients to understand them, to serve them. In return they help us by growing our presence better.

WE FOCUS ON SUSTAINABILITY

To make sustainability and environmental preservation a part of everything we do.

The sustainable clothing does not only refer to the use of waste materials with juicers on the show, or the design of degradable paper clothing. We start from material sustainability of recycled fabric, botanic fabric and so on, then dyeing sustainability, package sustainability with biodegradable bags, management sustainability with accurate production and digital marketing. We advocate emotion lasting design to reduce fashion waste.

RECYCLED PLASTIC BOTTLES TO ACTIVE

We offer four way stretch fabric that made from recycled plastic bottles. ECO fashion, the new luxury proceeding by top brands, you can realize it with fitfever. We use recycled fiber from REPREVE®, top recycled fiber brand in the world. REPREVE balanced new petroleum, emitting less carbon and effectively use water and energy in the process. It's traceable with authorized certification.

GET CATALOG

PLANTS TO ACTIVE

Tencel® fabric is made of eucalyptus wood pulp in a closed physical production. It is dissolved and spun in ammonium oxide solvent, which can be recycled. SORONA® fiber core PDO is derived from plant starch glucose, not petroleum, and uses 37% plant-based raw materials.

GET CATALOG

A woman with long brown hair, wearing a light blue athletic top and leggings, is performing a tree pose (Vrikshasana) on a rocky shore. She is standing on one leg with her other leg raised and foot resting on her inner thigh. Her hands are pressed together in a prayer position (Anjali Mudra) in front of her chest. The background shows a calm sea and a cloudy sky at sunset or sunrise.

SEA WASTE TO ACTIVE

There are 160,000 tons of oyster shells waste in Taiwan each year. Chengjia Kefang has nano-sized oyster shells into powder, combining natural calcium carbonate plus trace metal elements, and recycled PET to produce sea wool yarn, selling world widely.

[GET CATALOG](#)

ECO WOOL TO ACTIVE

DARLON® is sustainable fiber from Germany Bayer group. It's super soft and warm as wool fiber.

Warm as wool, Less CO2 emitted in dralon production
.Less water needed in darlon production.The water demand for the production of our dralon® fiber is extremely low – only 6 l of water per kg/fiber about 80% of which can be immediately recycled and refeed into the water cycle.
